WORK EXPERIENCE

Pantera Capital Remote
Research Engineer *April 2024 - October 2026*

- Ran econometric analyses of $7.8B in Kalshi and Polymarket trades to study short-term market structure, settlement behavior, and bot activity.
- Led research projects from study design, data collection, and experimentation through statistical analysis, validation, and publication.
- Authored two State of Tokenization reports and co-developed the Tokenization Progress Index to assess onchain asset maturity.
- Built and maintained databases covering 600+ tokenized real-world assets and developed Pantera's public analytics portal.
- Designed and built integrations across Telegram, Slack, and internal databases to automate pitch intake and deal tracking.
- Developed Twitter engagement rankings for portfolio companies and daily AI research briefs using ChatGPT.

Messari Remote
Enterprise Research Analyst *April 2022 - April 2024*

- Authored 50+ long-form research reports spanning L1s, L2s, NFTs, DeFi, and consumer applications.
- Applied Sybil-detection heuristics across Base, zkSync, and Polygon zkEVM to flag suspected airdrop farming.
- Developed a machine-learning model to infer friend.tech's points allocation from onchain user activity.
- Mapped user activity across Lens applications with network graphs and analyzed engagement, retention, and migration.
- Built SQL and Python data pipelines, dashboards, and visualization tools that automated recurring research workflows.
- Automated the creation of research database entries with a ChatGPT-powered Slack integration.

Magnusson Klemencic Associates Seattle, WA
Structural Engineer *July 2018 - March 2022*

- Designed and analyzed 7M+ sq ft of high-rises for high seismic and wind loads across the U.S. and Southeast Asia.
- Developed firm-wide Excel/VBA and Python tools to automate foundation and moment-frame member design from 3D model results.
- Coordinated structural design with architects, contractors, and engineering teams from concept through construction.

KPFF Consulting Engineers Seattle, WA
Structural Engineering Intern *May 2017 - August 2017*

- REI headquarters structural design; SeaTac International Arrivals Facility shop drawing review.

HNTB Corporation Chicago, IL
Structural Engineering Intern, Bridge Design *May 2016 - August 2016*

- CSiBridge load ratings for a Detroit bascule bridge; Chicago bridge inspections.

PROJECTS

Syndicate Remote
Technical Cofounder & Sole Engineer *January 2026 - Present*

- Built and launched a local-first Electron app orchestrating Claude, Codex, Gemini, and Copilot agents.
- Designed manager-led task delegation and natural-language agent creation, with scoped tools and configurable human approvals.
- Hardened provider integrations with input sanitization, retired-model detection, and authentication-failure handling.
- Engineered append-only JSONL message storage with atomic migration, incomplete-write handling, and automatic backup recovery.

EDUCATION

University of Illinois at Urbana-Champaign
M.S., Civil and Environmental Engineering *May 2018*
B.S., Civil and Environmental Engineering; Minor in Business *May 2017*
Areas of Emphasis: Structural Engineering & Construction Management
Recognitions: James Scholar Honors Program, College of Engineering Dean's List
Awards: Engineering Visionary Scholar, C.S. and Ruth Monnier Scholarship, Corsetti Scholarship Fund

SKILLS

Python, SQL, Snowflake, Pandas, NumPy, Scikit-Learn, NetworkX, Plotly, Matplotlib, React, TypeScript
